Sebastiaan Fehr

Studio Director

Melbourne, Australia 0410 810 858 sebfehr@gmail.com
LinkedIn GitHub actuator.digital

Studio director and engineering leader with 14+ years' experience across PC, console, VR, mobile and enterprise software. Leading Actuator Digital since 2017, with a peak team of 12 full-time staff and regularly managing 3+ concurrent projects. Current focus: AI-assisted game production.

STUDIO LEADERSHIP

Studio Director | Actuator Digital

Jan 2017 - Present

Game development, co-development and enterprise software

- Set studio direction and manage budgets, cash flow, sales and resource planning.
- Align technical direction with client business goals, communicating priorities and delivery constraints to executives and production teams.
- Lead recruitment and mentoring, set engineering standards, and coordinate engineering, design and art around shared delivery goals.
- Set scope, schedules and technical priorities across client projects and original games.
- Manage client relationships and integrate teams into partner studios, including The Binary Mill, XR Games, SMG Studio, PlaySide Studios and CR Digital.
- Guide original games from concept to release, using playtesting and community feedback to shape design and positioning.

SELECTED GAMES AT ACTUATOR

On Point | Original IP, Meta Quest & PC VR

Led development of Actuator's first original game, released in full in December 2025 with 115 minigames. Finalist, Excellence in Extended Reality, 2026 Australian Game Developer Awards (AGDAs).

Schrodinger's Cat Burglar | Technical support for Abandoned Sheep

Actuator identified rendering bottlenecks and recommended optimisation priorities based on impact and effort. Support also covered programming, Steam integration and platform testing. The game won Excellence in Narrative at the 2026 AGDAs and was a finalist for Gameplay and Accessibility.

Into Black | Multiplayer co-development for The Binary Mill

Actuator adapted a single-player game for multiplayer, synchronising combat, enemies and shared world state while handling players joining and leaving sessions.

HITMAN 3 VR: Reloaded | Co-development for XR Games

Actuator delivered shader and VFX support, performance profiling and technical QA for Quest 3, helping XR Games prioritise fixes before release.

AI-ASSISTED DEVELOPMENT

Based Code | Developer & Twitch Partner
Apr 2025 - Present

basedcode.dev

- Develop Not Monsters, a multiplayer game in Godot and C#, with AI-assisted coding and 3D asset workflows covering generation, optimisation and in-engine review.
- Build production tools, including Navoke, and establish code review standards, automated tests and multiplayer checks.
- Manage Steam release preparation, including demo and playtest builds, automated deployment and Steamworks submissions.

EARLIER EXPERIENCE

Co-Founder & Senior Software Engineer | Cree8ware Sep 2014 - Dec 2016

Led delivery of software for construction estimation, time tracking and reporting. Built financial analysis and payroll systems supporting 200+ employees.

Founder | Pixelflair Interactive Jan 2013 - Aug 2014

Led a small independent team building enterprise productivity tools, mobile games and lifestyle apps.

Tutor, Object Oriented Programming | QUT Jan 2013 - Aug 2014

Taught object-oriented programming, software design and debugging.

Programmer | The Binary Mill Jan 2012 - Aug 2014

Developed multiplayer, account and social features for released games, working with design and production teams.

TECHNICAL EXPERTISE

Engines: Unity, Unreal Engine and Godot.

Engineering: C# / .NET, multiplayer networking, software architecture and performance optimisation.

Production: Automated testing, CI/CD, Git, Perforce and release management.

INDUSTRY COLLABORATION

- Organiser, Brisbane Unity Developers meetup; panel moderator, AWE Nite Queensland.
- Connected Screen Queensland with Twitch and led Actuator's creator outreach and streaming production for the 2026 Let's Play Streamer Summit at Queensland Games Festival.
- Keynote speaker, Griffith University's 2024 Experimental Game Design Conference; QUT guest lecturer. Creator and maintainer of open-source tools Unity Test Pilot and Flume.

EDUCATION

Bachelor of Games and Interactive Entertainment
Queensland University of Technology, 2008 - 2012
Software Technologies major; Animation minor
